905-631-7887**

ONGUARD PNP LIQUID RESIDUAL kills insects as listed below. In addition to contact kill, this Residual Spray stays on treated surfaces and kills insects after the spray deposit has dried. This insect Spray is ready to use undiluted, and is applied using the attached application device to ensure target applications. **Kills Spiders, Sowbugs, Earwigs, Cockroaches, Crickets, Silverfish, Ants, Fleas, Carpet Beetles, Brown Dog ticks, Cluster Flies, House Flies, Bees, Wasps, Yellow jackets, and Hornets**

DIRECTIONS FOR USE: Hold container approximately 30 cm from the surface being sprayed and spray until wet. This ready-to-use liquid should be applied with the available trigger spray nozzle that attaches to the bottle. Thorough applications may be applied onto surfaces or into cracks and crevices for insect control. If reinfestations occur, repeat applications as necessary. Provide adequate ventilation after indoor use. **KEEP PETS AND CHILDREN AWAY FROM SURFACE UNTIL DRY.** **LIMITATIONS:** Do not use as a stream spray inside homes.

TO CONTROL SPIDERS, SOWBUGS, EARWIGS, COCKROACHES, CRICKETS, SILVERFISH, ANTS, FLEAS, CARPET BEETLES, BROWN DOG TICKS, CLUSTER FLIES AND HOUSE FLIES:

INDOOR USE: Apply ONLY as a coarse spray to infested surfaces until wet, moving the spray rapidly enough to prevent excessive wetting of surfaces and waste of material. Thoroughly treat cracks and crevices and spots along baseboards, underneath furniture and equipment, around garbage containers, localized areas of floors and floor coverings and other places that insects inhabit. For ants, spray trails and places where ants enter premises such as window and door sills.

OUTDOOR USE: Spot Treatment: Apply as a coarse spray to the outside surfaces of screens, doors, window frames, foundations, patios, light fixtures and other places where insects may alight, or congregate and enter. For ants, spray hills and runways. The cluster flies and house flies will be killed when they land on the treated surfaces.

TO CONTROL BEES, WASPS, YELLOW JACKETS, AND HORNETS:

OUTDOOR USE: Apply as a stream spray to completely saturate the nests of **Bees, Wasps, Yellow jackets, and Hornets**, from a distance of 2 to 2.5 metres. Allow sufficient time for insects to die. Application to nests should be made in late evening or early morning when insects are at rest.

PRECAUTIONS: **KEEP OUT OF REACH OF CHILDREN.** May be harmful if swallowed, inhaled or absorbed through skin. Provide adequate ventilation of area being treated. Avoid contact with skin, eyes and clothing. Avoid breathing spray mist. Wash thoroughly with soap and warm water after using. Do not use on humans, plants or animals. Do not use as a space spray. Cover fish bowls and remove pets for one hour when spraying. Do not use in areas where food is handled, prepared or stored. Remove or cover all exposed foods or cooking utensils before spraying. Do not allow children or pets to contact treated areas until surfaces are thoroughly dry. Do not contaminate food, utensils or animal feeding areas. Toxic to bees, fish and wildlife. Do not contaminate any body of water. Do not spray near open flame or spark, or while smoking. Do not spray asphalt shingles, as this product may stain them.

FIRST AID: If swallowed: Call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person. If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give

artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. Take container, label or product name and PCP Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Contains petroleum distillate. Vomiting may cause aspiration pneumonia. Treat symptomatically.

DISPOSAL: Do not reuse empty container. Wrap container in several layers of newspaper and discard in garbage.

STORAGE: Store in a cool dry area away from heat.
